Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Amendment

Applicant is reminded of the provisions of 37 CFR 1.121(c)(3) which states, "Any claim added by amendment must be indicated with the status of "new" and presented in clean version, i.e., without any underlining."

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 10, "the octagonal tubular formwork...elements" lacks antecedent basis within the claim. Therefore, it is not clear as to what "the octagonal tubular formwork...elements" refers.

Claim 2, to which engagement portion does "the male engagement portion" refer?

Claim 3, to which engagement portion does "the male engagement portion" refer?

Claim 12, to which engagement portion does "the male engagement portion" refer?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6, 8, 10-13, 15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Piccone '648. Piccone '648 discloses, Figs. 3 and 4, a panel 14 having perforations 55 with engagement portions 78, 80 at the end thereof in the form of an H-shaped engagement portion. As for **claims 10 and 11**, Piccone '648 shows, as in Fig. 1, finishing a plurality of elongated tubular form elements as by mating an insert panel 14 with at least one of the elongated tubular form elements.

Claims 1-9 and 12-18, are rejected under 35 U.S.C. 102(b) as being anticipated by Pluckebaum '427. Pluckebaum '427 discloses, Figs. 9 and 10, a panel 1, 11 having respectively, one substantially straight or flat surface, (panel 1), and two substantially straight or flat surfaces residing at a perpendicular angle relative to each other, (panel 11), with engagement portions 2, 2' at the end thereof in the form of

an H-shaped engagement portion. Panels 1 and 11 have perforations for accommodating fasteners as can be seen in Fig. 1.

Claims 1-9 and 12-18, are rejected under 35 U.S.C. 102(b) as being anticipated by McNamara '999. McNamara '999 discloses, Figs. 8-10, a panel 52, 64 having respectively, one substantially straight or flat surface, (panel 52), and two substantially straight or flat surfaces residing at a perpendicular angle relative to each other, (panel 64), with engagement portions 54, 66 at the end thereof in the form of a T-shaped or P-shaped engagement portion. Panels 52 and 64 have perforations as can be seen in Figs. 9 and 10.

Claims 1, 10, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim '947. Kim '947 discloses, Figs. 3C and 8, a panel 25 having engagement portions 26 at the end thereof. As for **claims 10 and 11**, Kim '947 shows, as in Fig. 3C, finishing a plurality of elongated tubular form elements as by mating an insert panel 25 with at least one of the elongated tubular form elements 21.
